2. Installation of the extension

Please make sure you've downloaded extension package compliant with your Magento version. The compliance information is stated in the package filename. Once you've downloaded and unzipped the archive, please proceed with the following steps:

Extension has been bought on Marketplace

Then please use the official Magento User Guide to install the package.

Extension has been bought on Best4Mage.com and you have the package

1. Upload Files to your Magento 2 Installation

Upload the contents of the module package to the Magento root folder. This will not overwrite the existing Magento folders or files, only the new contents will be added.

In this case upload the folder(s)
/app to the root of your Magento Installation.

2. Installation of the extension

Open command line in folder root of Magento 2 and run commands via ssh using putty or others

```
php bin/magento setup:upgrade  
If you encounter issues after installation please also run  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```

After this has been done please go into your Magento 2 Backend and refresh all caches.

After this when you go to Stores->Configuration. There you should see the TAB Best4Mage Extensions and your newly installed Best4Mage MMF extension.

3. Uninstallation of the extension

Open command line in folder root of Magento 2 and run commands via ssh using putty or others
module:uninstall -r Best4Mage_MMF

3. Setting up MMF globally

It is relatively easy to set up MMF below the necessary steps to make it work on your website. In this General setup page you can set the Discount Label and see the version number and support info details. Go to

Stores->Configuration->Best4Mage Extensions->Best4Mage MMF

4. Setting up MMF Collections

Special attention has been paid to the setup of the collections. It is very easy to get your collections appear in your store. Just follow the setup flow. Basically a setup has three stages. Create a Collection, Create the different Selections in the Collection and finally add the products to the Selection

MMF Collection Setup Steps

1. In Admin, select Mix & Match Fashion from the Left Menu. You'll have 3 menu items (See above image).
 - a. Create Collection - Direct link to add new collection to your site.
 - b. Manage Collections - Manage all collections from grid.
 - c. Store Configuration - Direct link to the store configuration settings.
2. To create a new MMF Collection, Either select 'Create Collection' or go to 'Manage Collection' & click on 'Create Collection' button.
3. When a new collection form opens up, you'll see 11 tabs in left column for different information.

4. First tab will be for **'General Information'** related to the collection. Fill up all the necessary details.

The screenshot displays the 'Sports Collection' configuration page in Magento 2. The left sidebar contains navigation options: DASHBOARD, SALES, CATALOG, MIX & MATCH FASHION, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Sports Collection' and includes navigation links: Back, Delete Collection, Reset, Save and Continue Edit, and Save Collection. The 'COLLECTION INFORMATION' section is active, showing 'General Information' as the selected tab. The 'Status' is set to 'Enabled'. The 'Collection Title' is 'Sports Collection' and the 'Url Key' is 'sports-collection.html'. The 'Description' field is empty and has a rich text editor. The 'Show Summary Bar' option is set to 'Yes' and the 'Summary Bar Position' is set to 'Bottom Bar'. The 'Collection Look' section shows two preview thumbnails of product grids.

- a. Select status of the collection i.e. Enabled/Disabled.
- b. Add Title & Description to explain your idea of collection.
- c. Make sure you create a unique 'URL key' for each MMF collection. So you can put a direct link in your menu.
For example, if for a 'Kids Fashion' collection you put URL key as 'kids-fashion', your collection URL will be - <https://www.yoursite.com/kids-fashion>. It is also possible to call collections directly from a category. We will explain this later in the manual.
- d. 'Show Summary Bar' option will give a sticky/floating bar showing all the products. You can select position (top,bottom,left,right) from 'Summary Bar Position' option.

- e. Select 'Collection Look' from 2 layouts. Our recommendation is if you have odd number of selections, then the first option i.e. 'Side-by-side layout' is best suitable. & If you have even number of selections with many products, the second option is best i.e. 'Middle-aligned layout'. Just try out this setting to make it suit your needs.

After the basic information is set, next is Discount settings. If you want to provide discount on the collection you set that from this section.

Discount Information

Discount Type *

Discount Amount

Discount Rule *

Show Discount Notification *

Notification Text

Notification Position

Notification Background Color

Notification Foreground Color

- a. Set discount type at N/A (no discount is used) or set a percentage or fixed amount.
 - b. Discount Rule can be set to be based on Minimum total quantity, or rule will be applied when at least 1 product has been selected from each selection.
 - c. If you want you can set a Discount Notification Bar and put in your own Text, position and Colors of the text and background.
2. In the left menu bar you see below the General Information TAB 10 available **Selections**. These selections will be used to store the products within the Collection. What are the different "categories" in your collection? Put them all as a selection in each tab.
 - a. For example, If you are creating Sports Outfit Collection, your different kind of selections could be shorts, shirts, shoes etc.

- b. Add all the information in the selection tabs. Title, Sort Order & Select products that you want to sell in that selection. Like all the Shorts in the Selection 1 TAB. As soon as you have filled a Selection the Title changes to the Selection Title so you can easily keep track of already filled Selections.

The screenshot displays the MMF Collection Management interface. On the left is a vertical sidebar with navigation icons and labels: MIX & MATCH FASHION, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'COLLECTION INFORMATION' and contains a 'General Information' tab. Under this tab, there are several selection tabs: 'Trousers (4)', 'Shoes (3)', 'Tanks and Tops (5)', 'Selection 4', 'Selection 5', 'Selection 6', 'Selection 7', 'Selection 8', 'Selection 9', and 'Selection 10'. The 'Trousers (4)' tab is active, showing 'Selection Information' with 'Selection Title' set to 'Trousers' and 'Sort Order' set to '1'. Below this is a 'Choose Product(s)' section with a search bar, a 'Reset Filter' button, and a message '4 records found'. A pagination control shows '20 per page' and '1 of 1'. A table lists the selected products:

<input checked="" type="checkbox"/>	Product ID	Name	Type	SKU
<input type="checkbox"/>	From: <input type="text"/> To: <input type="text"/>			
<input checked="" type="checkbox"/>	898	Cobalt CoolTech™ Fitness Short	configurable	MSH01
<input checked="" type="checkbox"/>	903	Apollo Running Short	configurable	MSH02
<input checked="" type="checkbox"/>	916	Meteor Workout Short	configurable	MSH03
<input checked="" type="checkbox"/>	929	Torque Power Short	configurable	MSH04

3. After that Save everything you have set & hit the URL on your site to see the MMF Collection in action.

Click [here](#) for an example in our demo store for a Sports Collection we have created.

Steps to show collection through category.

You can also set a Product Category to show MMF Collection. A Product category will automatically show up in the frontend Menu. So this will save you from the extra effort to show MMF collection with its URL key. Here is how you can set it.

The screenshot displays the Magento 2 admin interface for editing a category. On the left, a category tree shows 'Sport Collection' selected under 'MMF Demo's (0)'. The main area contains the following settings:

- Enable Category** (store view): Yes
- Include in Menu** (store view): Yes
- Category Name** (store view): Sport Collection
- Select MMF Collection**: Sports Collection (indicated by a blue callout bubble: "Select the collection")
- Content**: (indicated by a dropdown arrow)
- Display Settings**: (indicated by a dropdown arrow)
- Search Engine Optimization**: (indicated by a dropdown arrow)
- Products in Category**: (indicated by a dropdown arrow)
- Design**: (indicated by a dropdown arrow)
- Use Parent Category Settings** (store view): No
- Theme** (store view): -- Please Select --
- Layout** (store view): MMF Collection Layout (indicated by a blue callout bubble: "Select MMF Layout")

- a. Create a new Category or use existing one.
- b. You'll see a new option "Select MMF Collection". Select a collection that you want to show in this category.
- c. Last step is to go to 'Design' tab & select Layout - 'MMF Collection Layout'. Save the category & you can see the MMF collection on that category page now.

These are the basic things you need to know. If you need any help to set things up just create a support ticket at our website www.best4mage.com

For any further questions or technical issues please also create a support ticket.
